AIRCRAFT DESIGN AND TECHNOLOGY

Aerospace *glasnost*, Jan., p. 20.
Ball and the jack, Jan., p. 44.
Europe's tilt rotor starts to roll, Feb., p. 12.
Unmanned air vehicles—a prospectus, Feb., p. 26.
PIONEER is operationally capable, Feb., p. 30.
AMBER for long endurance, Feb., p. 32.
CONDOR for high altitudes, Feb., p. 36.
Automating mechanical design, Feb., p. 40.
Magnets promise productivity, March, p. 34.
Getting ready for a civil tilt rotor, March, p. 8.
Realistic aircraft design, May, p. 5.
Materials for the NASP, May, p. 24.
Structures for hypervelocity flight, May, p. 28.
Concorde: 20 years down, 20 to go, June, p. 14.
Designing for supportability, June, p. 44.
Aging aircraft, July, p. 38.
Different strokes, July, p. 52.
Innovation in general aviation, Aug., p. 30.
Credibility of NASP, Sept., p. 42.
Early warning of aircraft fatigue, Oct., p. 38.
The Soviets' French revelation Part II: Aircraft, Nov., p.42.
Aerospace '89: Aeroacoustics, Dec., p. 37.
Aerospace '89: Air transportation, Dec., p. 20.
Aerospace '89: Applied aerodynamics, Dec., p. 58.
Aerospace '89: Atmospheric environment, Dec., p. 22.
Aerospace '89: Atmospheric flight mechanics, Dec., p. 42.
Aerospace '89: Flight simulation, Dec., p. 71.
Aerospace '89: Flight testing, Dec., p. 47.
Aerospace '89: Fluid dynamics, Dec., p. 16.
Aerospace '89: General aviation, Dec., p. 36.
Aerospace '89: Ground testing, Dec., p. 14.
Aerospace '89: Lighter-than-air, Dec., p. 41.
Aerospace '89: Structures, Dec., p. 64.
Aerospace '89: V/STOL, Dec., p. 30.

AVIONICS AND ELECTRONICS

Sensors for science, Jan., p. 31.
Systems autonomy and telerobotics, Jan., p. 32.
High rate/capacity data handling, Jan., p. 38.
Lessons of Flight 655, April, p. 18.
Finding weak electronic links, April, p. 50.
Expert systems' role broadens, July, p. 26.
Promise of decision aiding, July, p. 30.
A pilot's view of intelligent systems, July, p. 32.
Shuttle failure detection, July, p. 34.
Aerospace '89: Digital avionics, Dec. p. 68.
Aerospace '89: Sensors, Dec. p. 72.

COMMUNICATIONS

Inmarsat diversification raises questions, Oct., p. 13.
Aerospace '89: Communications, Dec., p. 23.

COMPUTERS AND SOFTWARE

Computer virus threatens to become epidemic, Feb., p. 14.
Automating mechanical design, Feb., p. 40.
NASA's software engineering with Ada, Feb., p. 8.
No more waiting for drawings, March, p. 44.
Computer-aided battle management, June, p. 40.
AI gets a boost, July, p. 16.
Shuttle failure detection, July, p. 34.
Getting computers to listen, Aug., p. 52.
Computers boost structural technology, Nov., p. 30.
Aerospace '89: C^3I, Dec., p. 32.
Aerospace '89: CAD/CAM, Dec., p. 62.
Aerospace '89: Computer systems, Dec., p. 28.
Aerospace '89: Interactive computer graphics, Dec., p. 67
Aerospace '89: Software systems, Dec., p. 50.
Aerospace '89: Systems effectiveness and safety, Dec., p. 74.

EDUCATION

Proven feasibility is a must, Jan., p. 5.

INSTRUMENTATION AND TECHNOLOGY

Control of flexible structures, Jan., p. 36.
Precision segmented reflectors, Jan., p. 37.
Erosion of U.S. technical supremacy, Jan., p. 7.
Patching up the space station, March, p. 32.
Magnets promise productivity, March, p. 34.
Exploration case studies, April, p. 40.
Technology no barrier to SDI, May, p. 10.
Big savings from small holes, May, p. 32.
Designing for supportability, June, p. 44.
New view on holographic analysis, Sept., p. 48.
Astrometry: new vitality for an ancient science, Oct., p. 34.
New view of an ancient universe, Nov., p. 12.
The HST's optics, Nov., p. 15.
Keeping the HST on target, Nov., p. 18.
The HST engineering challenge, Nov., p. 21.
Computers boost structural technology, Nov., p. 30.
NDI: Ready right now?, Nov., p. 48.
Aerospace '89: Aerodynamic decelerators, Dec., p. 27.
Aerospace '89: Design engineering, Dec., p. 56.
Aerospace '89: Aerospace maintenance, Dec., p. 21.
Aerospace '89: Guidance, navigation, and control, Dec., p. 60.

INTERNATIONAL

Demand for inspiration, Jan., p. 10.
Japan's satellite builders shift into high gear, Jan., p. 12.
Aerospace glasnost, Jan., p. 20.
Europe's tilt rotor starts to roll, Feb., p. 12.
Japan broadens its aerospace interests, March, p. 12.
China stiffens launch competition, March, p. 20.
Barnstorming Soviets, March, p. 54.
Toward the "United States of Europe," April, p. 14.
The world is coming to Washington, April, p. 7.
Hotol spawns materials research, May, p. 12.
Beyond Apollo-Soyuz, June, p. 8.
A case for mutual force reductions, June, p. 10.
International cooperation in space, June, p. 32.
Soviet aerospace for sale, Aug., p. 16.
China holds course for space program, Sept., p. 6.
West Germany is key to future NATO strategy, Sept., p. 16.
World space harmony: more than words and music?, Oct., p. 8.
Inmarsat diversification raises questions, Oct., p. 13.
India joins a private club, Nov., p. 6.
Fraud allegation clouds EFA radar decision, Nov., p. 10.
Aerospace '89: Legal aspects, Dec., p. 46.

MANAGEMENT

Commercial upshot of Shuttle pricing, Aug., p. 14.
Aerospace '89: Management, Dec., p. 18.

MATERIAL

Spreading spectrum of reinforcing fibers, Jan., p. 14.
Multinational Mars exploration, Feb., p. 18.
New life for aluminum, March, p. 26.
Hotol spawns materials research, May, p. 12.
Taming ceramic fiber, May, p. 14.
Materials for the NASP, May, p. 24.
Structures for hypervelocity flight, May, p. 28.
Modern alchemy cuts casting costs, May, p. 44.
Spring thaw in space, May, p. 56.
Revolution in thermocomposites, July, p. 18.
Aerospace '89: Materials, Dec., p. 55.

MISSILES

A family of advanced SAMs, March, p. 10.
India joins a private club, Nov., 6.
Aerospace '89: Missiles, Dec., p. 24.

POLICY

Demand for inspiration, Jan., p. 10.
The Bush administration and aerospace, Feb., p. 10.
Aeronautics: Investing in the future, Feb., p. 5.
NASA stressing automation and robotics, Feb., p. 50.
Barnstorming Soviets, March, p. 54.
NASA gets a boost, April, p. 10.
Lessons of Flight 655, April, p. 18.
Making a home in space, April, p. 30.
Exploration case studies, April, p. 40.
Western defense for the '90s, May, p. 8.
Avoid tampering with success, June, p. 5.
Beyond Apollo-Soyuz, June, p. 8.
A case for mutual force reductions, June, p. 10.
International cooperation in space, June, p. 32.
Science can survive nuclear reactors in space, July, p. 5.
Washington digest, July, p. 13.
Space and the environment, Aug., p. 5.
Global war on global change, Aug., p. 8.
Galileo's tortuous journey to Jupiter, Aug., p. 20.
Private financing sought for space, Sept., p. 13.
West Germany is key to future NATO strategy, Sept., p. 16.
A perspective on Voyager, Oct., p. 4.
Inmarsat diversification raises questions, Oct., p. 13.
Striking a blow for Galileo, Nov., p. 5.
Fraud allegation clouds EFA radar decision, Nov., p. 10.
Congress agrees on spending bills, Dec., p. 6.
Aerospace '89: Support systems, Dec., p. 70.
Aerospace '89: Technical information, Dec., p. 43.

PROPULSION AND POWER

Advanced propulsion, Jan., p. 29.
High capacity nuclear power, Jan., p. 39.
Liquid lift for the Shuttle, Feb., p. 22.
Nuclear thermal rockets: next step to space, June, p. 17.
The beginnings, June, p. 18.
Mars mission safety, June, p. 22.
Gas-core technology, June, p. 25.
Nuclear propulsion for orbital transfer, June, p. 27.
Future space power needs: too big for one nation?, Aug., p. 11.
Indigenous Martian propellant, Aug., p. 48.
Aerospace '89: Aerospace power, Dec., p. 63.
Aerospace '89: Airbreathing propulsion, Dec., p. 38.
Aerospace '89: Electric propulsion, Dec., p. 78.
Aerospace '89: Liquid propulsion, Dec., p. 15.
Aerospace '89: Propellants and combustion, Dec., p. 52.
Aerospace '89: Solid rockets, Dec., p. 48.

ROBOTICS

Systems autonomy and telerobotics, Jan., p. 32.
NASA stressing automation and robotics, Feb., p. 50.
Space robotics in the '90s, Aug., p. 38.
West Germany's first space robot, Aug., p. 42.
Rover on a chip, Oct., p. 22.

SPACE AND ATMOSPHERIC SCIENCE

Inspecting our upper atmosphere, Jan., p. 24.
Throwing away pieces to the puzzle, Jan., p. 6.
Error found in orbital debris projections, April, p. 12.
Making a home in space, April, p. 30.
Looking at the architecture, April, p. 36.
Exploration case studies, April, p. 40.
Fundamental physics in microgravity, April, p. 46.
International cooperation in space, June, p. 32.

Aerospace '89: Space sciences and astronomy, Dec., p. 12.
Aerospace '89: Terrestrial energy, Dec., p. 54.
Aerospace '89: Thermophysics, Dec., p. 75.

SPACE STATION

Patching up the space station, March, p. 32.
Fleeing Freedom, May, p. 38.
Soviet aerospace for sale, Aug., p. 16.
Space Station Freedom: the crucial next step, Sept., p. 5.
NASA reassures edgy space station partners, Sept., p. 8.
What's on Freedom for users?, Sept., p. 20.
Logistics comes to space, Sept., p. 26.
Getting a grip on the software, Sept., p. 28.
A new role for Freedom, Sept., p. 30.
Station delays upset Japan and ESA, Dec., p. 4.

SPACE TRANSPORTATION

Aerospace *glasnost*, Jan., p. 20.
Multinational Mars exploration, Feb., p. 18.
Liquid lift for the Shuttle, Feb., p. 22.
China stiffens launch competition, March, p. 20.
Build another launch vehicle—now, March, p. 5.
Looking at the architecture, April, p. 36.
Infrastructure considerations, April, p. 38.
Hotol spawns materials research, May, p. 12.
Fleeing Freedom, May, p. 38.
Advantages of a round-body shuttle, July, p. 44.
H-II launch delayed, Aug., p. 18.
China holds course for space program, Sept., p. 6.
Predicting launch vehicle failure, Sept., p. 36.
Aerospace '89: Space transportation, Dec., p. 66.

SPACECRAFT

Japan's satellite builders shift into high gear, Jan., p. 12.
Rebuilding the space technology base, Jan., p. 28.
Advanced propulsion, Jan., p. 29.
Multinational Mars exploration, Feb., p. 18.
To the Moon on gossamer wings, March, p. 40.
Looking at the architecture, April, p. 36.
Big savings from small holes, May, p. 32.
Spring thaw in space, May, p. 56.
Beyond Apollo-Soyuz, June, p. 8.
Remembering Apollo 11, July, p. 8.
Galileo's tortuous journey to Jupiter, Aug., p. 20.
Indigenous Martian propellant, Aug., p. 48.
Think small—in large numbers, Oct., p. 14.
How to make space science a frequent flier, Oct., p. 18.
Rover on a chip, Oct., p. 22.
The Soviets' French revelation Part I: Spacecraft, Oct., p. 30.
Soyuzcarta's hard sell, Nov., p. 8.
Aerospace '89: Space operations and support, Dec., p. 57.
Aerospace '89: Space systems, Dec., p. 33.

STRATEGIC DEFENSE INITIATIVE

Technology no barrier to SDI, May, p. 10.
Computer-aided battle management, June, p. 40.
